

LEADING THE WORLD IN INTEGRATED CONCRETE DOME SOLUTIONS SINCE 1977

Daren has spent his entire career in the construction business, including owning a residential, light-commercial construction company for 16 years. For 11 years he has worked for Dome Technology as project manager and sales manager. Daren has overseen the construction of large-scale industrial storage and material-handling projects throughout the United States, Canada, South Korea, China, and Europe.

During his time with Dome Technology Daren has developed a passion for the construction of large community storm shelters along the Gulf Coast and throughout Tornado Alley. These shelters serve a dual purpose in protecting citizens and school children during high-wind events and acting as fire stations, gymnasiums, cafeterias, auditoriums, and event centers in the interim. He feels a level of satisfaction in protecting commodities throughout the world but nothing in comparison to protecting our greatest asset: our kids.

Daren enjoys spending time with his wife, four children, and grandkids. His hobbies include waterskiing, camping, horseback riding, fishing, hunting, and snowmobiling in the Idaho backcountry. He is also a longstanding volunteer with the Bonneville County Sheriff's Search and Rescue and is highly trained in wilderness first aid, technical rope mountain rescue, ice rescue, swift water rescue, and equine search and recovery.
